From LASIK to Diagnostic & Preventive Care

Shinagawa LASIK and Aesthetics Center Corporation (SLACC) began as one of Japan's top aesthetics centers in 1988 with over 40 branches in the country. Over the years, the group expanded its services to LASIK and other eye health services which ranked them to become a world-renowned leader with the highest number of successful LASIK procedures in the world. It ventured its business into the Philippines and has branches in Makati, Ortigas, and Bonifacio Global City. Today, Shinagawa is known to be the leading LASIK center in the Philippines.

Being the world leader in LASIK and Aesthetic medicine, Shinagawa takes on a new role this 2023 in diagnostic and preventive care, offering Japanese-style medical check-up services, advanced diagnostic imaging, and early detection of diseases.

Our objective is to provide the most comprehensive and high-quality diagnostic and preventive services offered at a reasonable price. Our emphasis on complete and accessible medical services ensures that our stakeholders are provided with the best and most proactive Japanese-medical standards while providing accessibility and personal care through Filipino hospitality.

We take pride in the advanced technology and medical practices and techniques, thus our stakeholders will be assured that only the most experienced and qualified people and machines are serving them, all the time.

Although health awareness is high in the Philippines, facilities and environments dedicated to preventive medicine are not in place. With this, Shinagawa Diagnostic & Preventive Care becomes the first one-stop medical hub that offers a comprehensive range of Japanese-standard health services that provide a wide range of diagnostic tests and customizable screenings by globally competitive medical specialists in bringing convenient, efficient, and affordable preventive diagnostic center.

Our Key Strengths

- **Comprehensive Medical Examination** - We provide comprehensive and personalized "Japanese-style" healthcare plans that contribute to the early detection and prevention of disease.
- **Double Reading by Japanese Doctors** - We provide double reading and consultation of results with Japanese expert doctors. With this, precision is provided to patients.
- **Cutting-edge and High-Performance Machines** - We utilize advanced and sustainable technology where procedures are done quickly and comfortably for patients.
- **Same-day Result** - Fast and reliable medical system through efficient and streamlined operation by using the Japanese Health Checkup Information System.

WORLD CLASS STANDARDS. EXCEPTIONAL CARE.

Our Mission

We are committed to providing high-quality medical services with the use of Japanese standards and expertise for diagnostic and preventive care to achieve optimal health for all our patients.

Our Vision

We aim to be the leading Diagnostic & Preventive Care Facility providing Japanese-standard medical service with advanced technology and state-of-the-art preventive health solutions integrated with Filipino hospitality.

Our Values

People-Centric

We respect the needs of our patients and partners. Our care is designed for their best experience, dedicated to empower people sharing one mission and goal.

Commitment to Quality

We strive to deliver only the highest quality of diagnostic and preventive service that meets the standards of Japanese Healthcare and Filipino Hospitality.

Innovation

Encoded in our values is the pursuit of providing cutting-edge technologies with world-class techniques bringing clear and accurate results with fast turnaround.

Transparency

We champion honesty and integrity. We promote openness in sharing information about the structure, plans, and procedures to promote awareness among patients and partners.

Our Strategic Location

Shinagawa Diagnostic & Preventive Care is located in the central district business of NCR which is accessible in areas of Metro Manila for patients' convenience and is part of a high-end corporate building in BGC.
