SHINAGAWA
DIAGNOSTIC & PREVENTIVE CARE

Brain Health Check

MRI for Preventive Health Screening

What is Brain Health Check?

Shinagawa's Brain Health Check includes Brain MRI and Brain MRA examinations.

Brain MRI

Brain MRI is an examination that is performed for the purpose of imaging and diagnosing a cross-sectional view of the brain.

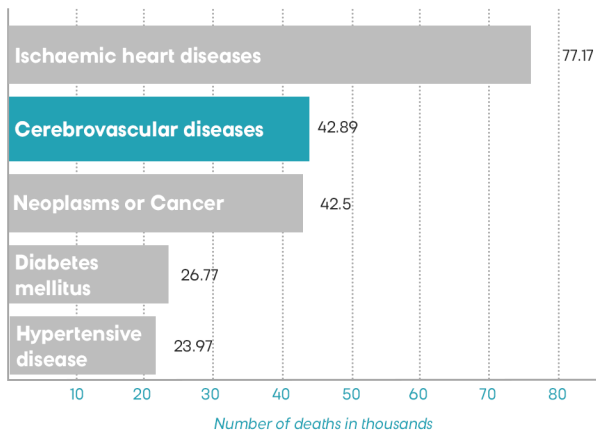

Brain MRA

Brain MRA is an examination to examine blood vessels in detail, looking for cerebral aneurysms, cerebral artery occlusions, etc.

It is effective for early detection of brain abnormalities in a minimally invasive manner. Since no X-rays are used, there is no exposure to radiation.

Leading causes of death in the Philippines

Data from January to September of 2022 shows that **cerebrovascular diseases such as stroke and aneurysms** is the **second leading** cause of death in the Philippines, amounted at 42,890.

Source: Statista Research Department, Feb. 2023

Brain Health Check is recommended for:

Patients who are prone to have brain diseases (30 years old and above)

Those with high neutral fat, visceral fat, uric acid, and cholesterol

Those with lifestyle-related diseases such as high blood pressure and diabetes

Patients who experience signs and symptoms of migraines, chronic headaches, vertigo, and unexplained vision issues

Patients with a family history of brain disease or stroke

Why Choose Shinagawa

01

Double Reading by Japanese Doctors

We do double reading and consultation of results with Japanese expert doctors. With this, precision is provided to patients.

02

The Country's First Helium-Free MRI Technology

Allowing ultra-fast exams and high-quality images for a seamless patient experience.

03

Regular Price for MRI Services

Our pricing remains the same and no additional physician fees will be charged to patients.
